WWTP - Digester blower is not running on auto, we found a broken wire conection. We need an electritian to do that work, we are running the blower manually. Plant computer is having issues, we found the internet security program on the computer. We ran it and it seemed to make the computer run better. Since the blower to digester was off for a long time, the sludge became septic and it grew a type of micro organism that prevented the correct operation of the Centrifudge. We had to dump the digester onto the ponds. Replaced one of the hatches at the lift station. Quarterly disinfection report sent in to NDEP.	11	\$50.00	\$550.00

8. Locomotive 81 – Work continues on Locomotive 81.

We went back into the history books. In the 1930s, Kennecott painted their steam locomotives green. The decision was made to paint Locomotive 81 green as it looked in the 1930s.
