To Whom it May Concern:

Thank you for your commitment to the City of Ely and your work to install a vehicle supercharger station at Ridleys Supermarket. Public charging stations are not as ubiquitous as gas stations and being as remote as Ely is we like to have resources for our residents as well as all of those that travel through our area. The decreased emissions that electric and hybrid vehicles emit over conventional vehicles is a benefit in keeping our air cleaner. The City of Ely is forward thinking and appreciate those that invest in our community to continue growth.

Again, thank you for your investment and commitment to the City of Ely.

Sincerely,

Nathan Robertson, Mayor
